SUMMARY

Software developer focused on building full-stack web applications with React, Java, Spring Boot, and PostgreSQL. Developed responsive interfaces, REST APIs, domain logic, and relational data models through independent projects. Recent honors graduate with a strong foundation in object-oriented programming, web development, and maintainable application design.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, HTML, CSS

Frameworks & Libraries: React, Spring Boot, Spring Data JPA, Hibernate

Databases: PostgreSQL, relational database design

Tools & Practices: Git, GitHub, Maven, Flyway, Figma, REST APIs, responsive web design

SELECTED PROJECTS

UNO - Full-Stack Card Game | [Live Demo](#) | [API Source](#)

React | JavaScript | Java | Spring Boot | REST API

- Developed a responsive single-player UNO application with a React client and Spring Boot REST API, supporting two to five total players, computer-controlled opponents, and animated card interactions.
- Implemented server-side game state, turn progression, action-card effects, wild-color selection, draw-and-pass states, UNO calls, and penalties using separated domain, service, controller, DTO, and mapping layers.

Squirrel Tracker - Full-Stack Inventory Application | [Backend Source](#)

React | Java | Spring Boot | Spring Data JPA | PostgreSQL

- Built a CRUD application modeling relationships among squirrels, stashes, locations, items, and inventory quantities.
- Developed REST endpoints and React workflows for managing related records using Hibernate, PostgreSQL, Flyway migrations, pagination, request validation, database constraints, and centralized exception handling.

Word Search - Interactive Puzzle Generator | [Live Demo](#) | [Source](#)

React | JavaScript | Canvas API

- Developed a randomized puzzle-generation algorithm that places words in eight directions, prevents conflicting overlaps, and retries unsuccessful layouts.
- Built a responsive, high-resolution Canvas interface with pointer-based word selection, multiple puzzle categories, dynamic resizing, and progress tracking.

EDUCATION

Greenville Technical College | Greenville, SC

Associate in Applied Science, Computer Technology | Programming Specialization

Graduated with Honors, December 2025

Relevant Coursework: Object-Oriented Programming, Database Design, Web Development
