Summary

Full-stack developer with hands-on experience building web applications using Java, Spring Boot, React, C#, ASP.NET MVC, JavaScript, SQL, and REST APIs. Developed multiple personal projects involving front-end design, back-end architecture, databases, and client-server communication. Seeking an entry-level software development role where I can continue building real-world applications and grow as a developer.

Skills

Languages: Java, C#, JavaScript, SQL, HTML, CSS, Python
Frameworks: Spring Boot, React, ASP.NET Core MVC, REST APIs, JavaFX, Entity Framework Core
Databases: PostgreSQL, SQL Server
Tools: Git, GitHub, IntelliJ IDEA, Visual Studio, SSMS, Docker

Projects

UNO Game — JavaFX

Built a multiplayer UNO game using JavaFX with TCP sockets and JSON messaging.

Portfolio Website — React / JavaScript / CSS

Built a responsive React portfolio website showcasing full-stack and UI projects.

Word Search Game — JavaScript / HTML / CSS

Built an interactive word search game using JavaScript, HTML, and CSS.

Squirrel Tracker — C# ASP.NET Core MVC

Built a full-stack CRUD web application using C#, ASP.NET Core MVC, Entity Framework Core, and SQL Server.

Birdhouse Backend (Spring Boot, PostgreSQL)

Built a Spring Boot REST API using PostgreSQL to manage customer orders and application data.

Squirrel Tracker — Java Spring Boot

Rebuilt the Squirrel Tracker application using Spring Boot, React, and PostgreSQL with REST APIs and client-server architecture.

Education & Training

Greenville Technical College — Greenville, SC
A.A.S in Computer Technology (Programming Focus)
Relevant Coursework: Object-Oriented Programming, Database Design, Web Development
