SUMMARY

Software developer focused on building full-stack web applications with React, Java, Spring Boot, and PostgreSQL. Developed responsive interfaces, REST APIs, domain logic, and relational data models through client and independent projects. Recent honors graduate with a strong foundation in object-oriented programming, web development, and maintainable application design.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, HTML, CSS

Frameworks & Libraries: React, Spring Boot, Spring Data JPA, Hibernate

Databases: PostgreSQL, relational database design

Tools & Practices: Git, GitHub, Maven, Flyway, Figma, REST APIs, responsive web design

EXPERIENCE

Web Developer - Local Church Website | July 2026 - Present

Volunteer Client Project | React | TypeScript | HTML | CSS | Figma

- Worked with the church pastor to gather requirements and turn them into a sitemap, content plan, wireframes, and detailed designs for desktop and mobile.
- Created the initial React and TypeScript project structure and GitHub repository, preparing the pages and reusable components for implementation.

SELECTED PROJECTS

UNO - Full-Stack Card Game | [Live Demo](#) | [Backend GitHub](#)

React | JavaScript | Java | Spring Boot | REST API

- Built a responsive single-player UNO game with a React frontend and Spring Boot REST API, supporting two to five players, computer-controlled opponents, and animated card interactions.
- Wrote the backend game logic for turns, action cards, wild colors, drawing, passing, UNO calls, and penalties, while organizing the code so it is easier to understand and maintain.

Word Search - Interactive Puzzle Generator | [Live Demo](#) | [GitHub](#)

React | JavaScript | Canvas API

- Built an algorithm that creates new word-search puzzles by placing words in eight directions, preventing invalid overlaps, and retrying layouts that do not work.
- Built the game board with the Canvas API and added mouse and touch controls for selecting words, automatic resizing, multiple puzzle categories, and progress tracking.

EDUCATION

Greenville Technical College | Greenville, SC

Associate in Applied Science, Computer Technology | Programming Specialization

Graduated with Honors, December 2025

Relevant Coursework: Object-Oriented Programming, Database Design, Web Development
